EXAMINER'S AMENDMENT

1) An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Oppedahl (Reg. No. 32,746) on March 17, 2004.

2) The application has been amended as follows:

In the Claims:

Claims 1, 10, 20 and 30-31 have been amended as follows:

In Claim 1, line 5, --by electronic computation-- has been inserted after "first information".

10. (Amended) A method for use with purchased postal indicia, with mail pieces and with a purchaser having an identity, the method comprising the steps of:

requiring, as a precondition of receiving at least one addressed mail piece with a postal indicium into the mail, that the postal indicium bear second information derived by electronic computation from first information indicative of the identity of the purchaser;

receiving the at least one addressed mail piece with the postal indicium into the mail; and

delivering the at least one addressed mail piece.

20. (Amended) A method for use with purchased postal indicium, with mail pieces and with a purchaser having an identity, the method comprising the steps of:

Art Unit: 3629

requiring, as a precondition of delivering at least one addressed mail piece with a postal indicium into the mail, that the postal indicium bear second information derived by electronic computation from first information indicative of the identity of the purchaser;

receiving the at least one addressed mail piece with the postal indicium into the mail; and

delivering the at least one addressed mail piece.

30. (Amended) A method for use with mail pieces and with a recipient possessing a list of expected senders, and with a sender having an identity, the method comprising the steps of:

receiving a delivered mail piece bearing a postal indicium, the postal indicium bearing second information derived by electronic computation from first information indicative of the identity of the sender;

reading the second information derived by electronic computation from the first information indicative of the identity of the sender; and

determining whether the sender whose identity is indicated by the second information derived by electronic computation from the first information is on the list of expected senders.

In Claim 31, line 1, --second information derived by electronic computation from first -- has been inserted before "information".

The above changes to the claims have been made for clarity purposes so as to place the instant application in condition for allowance.

REASONS FOR ALLOWANCE

3) The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be directed to an unobvious improvement over Ruat (WO 95/20200).

W.R.T. Claim 1:

Ruat discloses a system for processing of mailing envelopes, which includes computer means for the entering, encryption and coding of information relating to the sender and to the recipient of an envelope as well as to its postage, and for printing, on the envelope or on a label, coded information items.

However, Ruat does not disclose the method comprising the steps of:

requiring, as a precondition of purchasing at least one postal indicium, receipt of first information indicative of the purchaser's identity; and

deriving second information functionally from the first information by electronic computation.

W.R.T. Claim 10:

Ruat discloses a system for processing of mailing envelopes, which includes computer means for the entering, encryption and coding of information relating to the sender and to the recipient of an envelope as well as to its postage, and for printing, on the envelope or on a label, coded information items.

However, Ruat does not disclose the method comprising the steps of:

requiring, as a precondition of receiving at least one addressed mail piece with a postal indicium into the mail, that the postal indicium bear second information derived by electronic computation from the first information indicative of the identity of the purchaser.

W.R.T. Claim 20:

Ruat discloses a system for processing of mailing envelopes, which includes computer means for the entering, encryption and coding of information relating to the sender and to the recipient of an envelope as well as to its postage, and for printing, on the envelope or on a label, coded information items.

However, Ruat does not disclose the method comprising the step of:

requiring, as a precondition of delivering at least one addressed mail piece with a postal indicium, that the postal indicium bear second information derived by electronic computation from the first information indicative of the identity of the purchaser.

W.R.T. Claim 30:

Ruat discloses a system for processing of mailing envelopes, which includes computer means for the entering, encryption and coding of information relating to the sender and to the recipient of an envelope as well as to its postage, and for printing, on the envelope or on a label, coded information items.

However, Ruat does not disclose the method comprising the steps of:

Art Unit: 3629

receiving a delivered mail piece bearing a postal indicium, the postal indicium bearing second information derived by electronic computation from the first information indicative of the identity of the purchaser;

reading the second information and determining whether the sender whose identity is indicated by the second information is on the list of expected senders.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

"Stamps.com: Technology Helps Improve Mail Security" is cited to show the service that provides extensive information regarding the sender's identity, point of origination and the path taken through the mail system.
